## MU 009 Realizing a lead sheet

- Finish writing out the chords for "Autumn Leaves" in staff notation, in whole notes / half notes.
- Write complete four-note chord voicings in the piano right hand, and single-note roots in the left hand.
- In the RH, use each circled melody note as the chord top note, then fill in the rest of the chord pitches below that in close position (no "gaps"). Remember, the bottom note of your RH chord voicing does not affect the chord inversion, because inversion is determined by the **lowest sounding** note, which is in the bass clef here.
- Transcribe the melody in the staff above.
- Then write a **roman numeral analysis** below the staff, in the key of G minor. **Make sure** all roman numeral symbols reflect the chord **qualities**!
